Tony Allred is owner and principal of Abacus, University of New Mexico graduate and native New Mexican.

Abacus Retirement Solutions, LLC is a third-party administrator (TPA) of qualified retirement plans. They specialize primarily in the design, implementation, and administration of 401(k) Plans, Profit Sharing Plans, and Cash Balance Plans. They've been in business since 2002.

Their services include consulting on plan design, preparation of plan documents and employee notices, trust accounting, performing compliance and non-discrimination testing, preparation of government forms, allocation of employer contributions - often maximizing owners, and withdrawal/rollover/loan processing.

They are not in the investment business but partner with local financial advisors and full-service investment recordkeepers.

They work closely with your CPA or tax advisor and are always happy to take calls from plan participants.

“Even as you hold this guide in your hands, the situation you face may look different,” Interim Superintendent Scott Elder wrote in the plan’s introduction to employees. “Gaps will need to be filled, decisions will need to be made, courses will need to be changed.”

The New Mexico Public Education Department instructed all the state’s public and charter schools to begin the 2020-2021 school year with a combination of online and in-school learning, a hybrid model.

APS opted to begin with an online model and then move into an every-other-week rotation as safety conditions allow. The hybrid model chosen by APS calls for students to attend school every other week instead of just two days a week because it allows for more continuity of instruction with fewer transitions for students. The schedule also allows for deeper cleaning between groups of students, better accommodates illness, provides opportunities for home-based projects, is easier for scheduling childcare, and offers more flexibility for electives and special programs. The Albuquerque Public Schools Reentry Plan calls for school to begin the week of Aug. 12 with the distribution of technology to all students, virtual home visits, and guidance for staff, students, and families on safely attending school and effectively learning at home.

Under the plan, which is subject to change depending on the spread of the coronavirus and public health orders, students would return to the classroom after Labor Day on an every-other-week rotation Tuesdays-Fridays.

Teachers and school staff are scheduled to return to school on Aug. 5 to begin preparing for online and in-school teaching and learning in a sanitized and safe setting that will include social distancing and the wearing of face coverings.

The plan outlines steps for swiftly moving to remote learning if the spread of the coronavirus isn’t curtailed and public health orders still call for residents to mostly stay at home.
